

Cautionary statement

3///////

This Review is intended to focus on matters which are relevant to the interests of shareholders in the Company. The purpose of the Review is to assist shareholders in assessing the strategies adopted and performance delivered by the Company and the potential for those strategies to succeed. It should not be relied upon by any other party or for any other purpose.

Forward looking statements are made in good faith, based on a number of assumptions concerning future events and information available to Directors at the time of their approval of this report. These forward looking statements should be treated with caution due to the inherent uncertainties underlying any such forward looking information. The user of these accounts should not rely unduly on these forward looking statements, which are not a guarantee of performance and which are subject to a number of uncertainties and other facts, many of which are outside of the Company's control and could cause actual events to differ materially from those in these statements. No guarantee can be given of future results, levels of activity, performance or achievements

Unless otherwise stated, all operating profit, margin and EPS data refer to normalised results of the continuing Group, which can be found on the face of the Condensed Group Income Statement in the first column. Normalised profit is defined as being the IFRS result excluding intangible asset amortisation and UK rail and restructuring, along with tax relief thereon.

Due to the one-off nature of UK rail and restructuring, the Board believes that its removal gives a more comparable year-on-year indication of the underlying performance of the Group. For intangible amortisation, the Board believes that adding back this non-cash item also gives a more comparable year-on-year indication of the underlying performance of the Group and allows better comparison of divisional performance which have different levels of amortisation.

The continuing Group is stated, and the prior year restated, before discontinued operations, details of which can be found in note 7 to the condensed interim financial statements.

Constant currency basis compares current period's results with the prior period's results translated at the current period's exchange rates. The Board believes that this gives a better comparison of the underlying performance of the Group.

H1 2017 Key highlights

[]]]]]]

- o Continued strong performance from our diverse international portfolio of cash generative businesses
- o Both North America and ALSA delivering record half year profits
- o UK performance more mixed reflecting market conditions, but positive reaction to management actions
- 2 acquisitions in Spain in the first half, 1 para-transit acquisition in North America in July
 Immaterial contribution to first half results
- o Successful exit from UK Rail reducing risk and focusing capital allocation on higher return markets
- o ROCE increased to 12.0%
- o Remain on target to generate £120m of FCF for 2017
- o Gearing reduced to 2.3x
- o 10% increase in interim dividend

North America	
Record half year with acquisitions performing well	

Delivering operational excellence

- Good bid season for 2017/18
- Strong contract retention 95% for renewals
- Average price increase of around 2.5% across portfolio, nearly 4% on our contracts up for bid and renewal
- o Acquisitions delivering higher returns
- Strong growth in Transit annualised revenue of \$275m including Cook-DuPage Transportation (CDT), more than doubling in the past 18 months.

Creating new business opportunities	Risk
 Acquisition of CDT in July - entry into largest single para- transit market (Chicago) Strong pipeline 	• Driver wage pressure of 5%

Generating superior cash a returns				
	2017	2016		
Revenue	\$683.9m	\$630.6m		
Op profit	\$70.1m	\$64.8m		
Margin	10.3%	10.3%		

Revenue: +8.4% in constant currency, with good organic growth together with bolt-on acquisitions **Profit:** +8.2% - margin remains above 10% and in line with last year, reflecting strong returns from acquisitions and despite cost pressures from driver wages, a lower number of operating days and adverse weather

ALSA

RMS driving incremental growth & returns

- Enhanced RMS providing greater accuracy on forecasting demand
- Delivering passenger growth on off-peak services and optimising price on peak services
- Strong growth in revenue, passenger volumes & yield
- Seeing an increase in yield on premium services - average fare 70%-130% higher than standard services
- Utilisation improving, up 3% in first half
- 。 €/Km up 4.0%
